Private GP care you deserve | Est.1998

### **COVID-19 PCR Swab Service for Newmont Travel**

#### **Why do I need a COVID-19 PCR swab for travel?**

Many destinations, including the Caribbean require a negative COVID-19 PCR swab for travel. Some also require a fit to fly certificate. This is to help reduce the spread of the virus, both on the flights and within the destination countries.

We are delighted to support Newmont Travel with their COVID-19 testing requirements to ensure everyone can get onto their flights and to their destinations without issue.

#### **About our clinic and laboratory:**

- Fully accredited
- Established in 1998
- Registered with the Care Quality Commission
- COVID-19 safety measures in place
- Over 5,000 tests for travel conducted so far

#### **Frequently asked questions:**

- **When should I have my test?**

- 
- Destinations vary in when they would like you to have your test. Some require it within 72 hours and others within 96 hours, for example. You should confirm this with your travel agent, airline or relevant government website or embassy. When you have this information, we can advise you as to the best time to have your test with us to ensure you receive your result at the right time.

- **Do I have to take my swab myself?**

- 
- No way! When you attend the clinic, one of our experienced clinicians will take your swab for you. This improves accuracy and ensures sufficient sample is taken. Your clinician will also verify your details to make sure they match your passport.

- **When and how will I receive my results?**

---

- Our turnaround time is 2 – 3 days with most results in 48 hours. We will email you your result as a PDF certificate that you can print off yourself. If you do not have access to a printer and a hard copy is required, you can collect your certificate from the clinic on pre-arrangement.

- **What is the fee?**

---

- The total fee is £175 for an at-clinic test. We do not charge anything additional for a supplementary letter or certificate.

- **How do I book?**

---

- The easiest way to book is online here (<https://www.harleyhealthcentre.com/booking>).

Choose A1: coronavirus PCR swab in clinic. If you cannot see the availability you require, please call us on 020 7323 1023 and press option 1.
